DETAILED ACTION

Applicant's election with traverse of Group I (claims 1-16, and add new claims 21-23) in 09/23/04 is acknowledged. The traversal is on the ground(s) that "the search for the product claims would be likely similar and disclosed the search for the method claims. This is not found persuasive because the method claims (claims 17-20) would be classified and searched in a different class than the product claims (claims 1-16), the product can be made without or different step of plating process, for example, a plurality of conductive vias of the product claims can be made by etching, electroless plating, CVD, or PVD instead of using plating process to form on the conductive vias.

Therefore, claims 17-20 are withdrawn from further consideration as being drawn to non-elected subject matter.

After review of the application's election, a further restriction of the elected claimed invention is as following:

The elected claims contain claims 1-16 direct to the following patentability distinct species of the claimed invention:

Specie 1 Figure 1, a semiconductor chip is directly connected to contacts of an interposer by interconnections.

Specie 2 Figure 2, a semiconductor chip is connected to contact of an interposer by bond wires.

If applicant elects one of the Species 1 or 2, then the sub-Specie should be follow described as below:

Specie I Figure 3A.
Specie II Figure 3B.
Specie III Figure 5.
Specie IV Figure 6.
Specie V Figures 8A-8B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims are not generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Clement A. Bernard (Reg. No. 29, 613) on December 15, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T Dinh whose telephone number is 571-272-1929. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kammie Cuneo can be reached on 571-272-1957. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
